

Daily Word Problems

Day Three

Name: _____

4-H

The Future Farmers Club has four members. Each decided to plant his or her favorite vegetable. Use the clues below to determine who grew each vegetable.

When you know that a vegetable is not grown by someone, make an X under that vegetable and across from that person's name.

When you know that a vegetable is grown by a person, write YES in that box. You can then X that vegetable for all the other people and X all the other vegetables for that person.

	Tomatoes	Beans	Carrots	Lettuce
Edward				
Lisa				
Ben				
Lara				

1. Edward grows a root vegetable.
2. Lara grows a green vegetable.
3. Ben uses his crop to make lots of spaghetti sauce.
4. Lisa's vegetable is most often cooked.

Name: _____

The Amazingly Adapted Polar Bear

by Guy Belleranti

Animals have special adaptations that help them survive in their habitats. One of the most interesting is the polar bear of the Arctic.

To stay warm, polar bears have two layers of fur. The hairs of the outer coat are hollow, increasing their insulating ability. They also have a thick, warm coat of fur below the outer coat. Underneath their fur polar bears have black skin which helps absorb heat. Underneath this skin polar bears can put on a layer of fat for even more insulation. In fact, during the cold of winter this fat may be over 4 inches thick!

Polar bears in warm-weather zoos can also adapt quite well. Their hollow hairs hold water, providing cooling. When living in a warm climate, they don't put on the thick fat layer because extra insulation isn't needed.

While polar bears do occasionally eat sea vegetation and berries, they prefer to hunt. In fact, they are the best hunters of all bears. When on land they often camouflage themselves by placing their paws over their black nose and mouth. Polar bears have the best vision of any bear and an excellent sense of smell. Fur and rough bumps on the soles of their wide snowshoe-like feet provide traction on ice.

Polar bears are well adapted for swimming to ice floes in search of their favorite food - seals. They use their partially webbed front feet to paddle, while steering with their back feet. They have a more elongated body and head than other bears. This shape helps them move through the water. In fact, this marine mammal can swim for 60 miles without stopping.

About the Author

Guy Belleranti works as a docent at Reid Park Zoo in Tucson, Arizona. The information in this article comes from his experiences working with animals and teaching others.

Name: _____

The Amazingly Adapted Polar Bear

by Guy Belleranti

1. What color is a polar bear's skin?
